

EXPERTS LIVE KENYA

26TH JULY 2024
NAIROBI, KENYA

Developing a Customized Solution for Dynamics 365 Business Central.

Francis Msangi Masera

Microsoft MVP, Microsoft MCT, Microsoft MCP, Consultant, YouTuber.

Meet Msangi

My name is Francis Msangi Masera, a seasoned Business Central Developer with 7 years of experience. My expertise spans across various industries including financial institutions, government and non-governmental organizations, as well as SMEs. Being a Microsoft MVP in the Business Central category and an MCT, I've committed my professional journey to offering high-quality services in implementation, consulting, training, and support. I also run a YouTube channel, www.youtube.com/@TekNaMsangi, where I've had the privilege of helping AL developers at all levels to enhance their skills significantly. Looking forward to our journey together!"

Roadmap

- What is ERP?
- Modern ERP systems
- Why is ERP important for business?
- What business functions can be optimized with ERP?
- Three signs that you need ERP software
- Three ERP implementation challenges for businesses
- Create an AL Programming Extension.

What is ERP?

A type of software system that helps organizations automate and manage core business processes for optimal performance.

- Coordinates the flow of data between a company's business processes, providing a single source of truth and streamlining operations across the enterprise.
- Links a company's financials, supply chain, operations, commerce, reporting, manufacturing, and human resources activities on one platform.

Modern ERP systems

- Offer flexible deployment
- Enhanced security
- Sustainability
- Low-code customization
- Fostering rapid innovation and future readiness.

Why is ERP important for business?

- Drive optimal performance
- Accelerate operational impact
- Ensure business agility

What business functions can be optimized with ERP?

- Commerce
- Finance
- Human Resources
- Manufacturing
- Supply Chain

Three signs that you need ERP software

- The basics aren't letting you grow
- You're dealing with disparate systems
- You can't meet customer expectations

o o o o

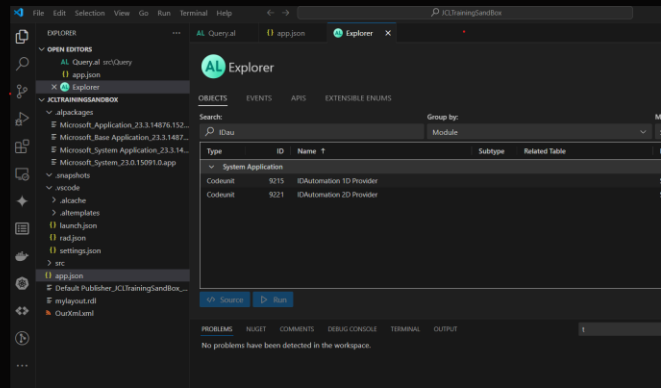

Three ERP Implementation Challenges for Businesses

- Choosing the right ERP solution.
- Affording the cost of an ERP system.
- Integrating new ERP software with existing software.

Let's Dive Deep

Conclusion

Effective ERP Implementation requires:

- Planning.
- Blending Skills.
- Consultants role.
- Market Demand
- Product Strength
- Skill Development
